GUIDELINES FOR THE RETURN OF TECHNETIUM GENERATORS
AUSTRALIAN CUSTOMERS ONLY

1. Remove the needle from the generator and rotate top plate to cover needle recess.

2. Remove radioactive labels from outside of box. Apply the Return Address Labels over the existing label.

3. Place the spent generator (ie 4 weeks from date of calibration) in the pack and carefully replace the expanded polystyrene sections. Ensure that the radiation level at any point on the external surface of the package does not exceed 5 microSv/h (0.5 mrem/h).

4. OUTSIDE SYDNEY METRO AREA

Generators must be returned as 'radioactive material, excepted packages, limited quantities of material - UN2910' and at least four weeks past date of calibration.

- Contact your local "TNT" office to arrange pick-up (Telephone 13 11 50). Alternatively you can return generators by Toll Priority (Telephone 13 15 31) If you are unable to contact these couriers please contact our Despatch Department on (02) 9717 9027. All goods are to be returned by Road Transport Only (see 'Service Required' below).

- TNT/TOLL will supply consignment notes (do not allow Courier Driver to fill out consignment note). These should be completed as follows:
