About Q2XAFS

Q2XAFS – Quality and Quantity of Data in XAFS Spectroscopy – is a symposium series bringing together international experts in the field of X-ray Absorption Spectroscopy to discuss aspects of the technique that affect data quality in XAFS experiments.

The next Q2XAFS meeting will be held on 17-18 August 2023 at the Australian Synchrotron, ANSTO, as a satellite of the IUCr Congress 2023 in Melbourne, Australia. A conference dinner will be held on the evening of Friday August 18 at a venue in Melbourne's CBD (downtown).

Topics include:

- Portability of XAFS data and scientific content between beamlines and facilities (*e.g.*, data formats, traceability and data provenance, *etc.*)
- Data repositories and access to data
- Precision and reproducibility of data and data treatment
- XAFS data and analyses for industry (*e.g.*, standards, quality control, *etc.*)
- New analytical methods
- Discipline-specific data standardisation
- Fluorescence XAFS data
- Theory development underscoring data quality and quantity

For further event details, please see our [Q2XAFS 2023 website](#).

Sponsorship of Q2XAFS

Sponsorship of Q2XAFS builds the profile of your organisation among up to 60 local and international delegates from Asia, Europe and North America, including world leaders, expert users and beamline scientists in XAFS.

We have designed two standard sponsorship packages (see overleaf). We can also customise a sponsorship package for you. Please feel free to [talk to us](#) about options.
