

How to measure your paper:

You will need to measure and cut a paper square, 21 cm by 21 cm.

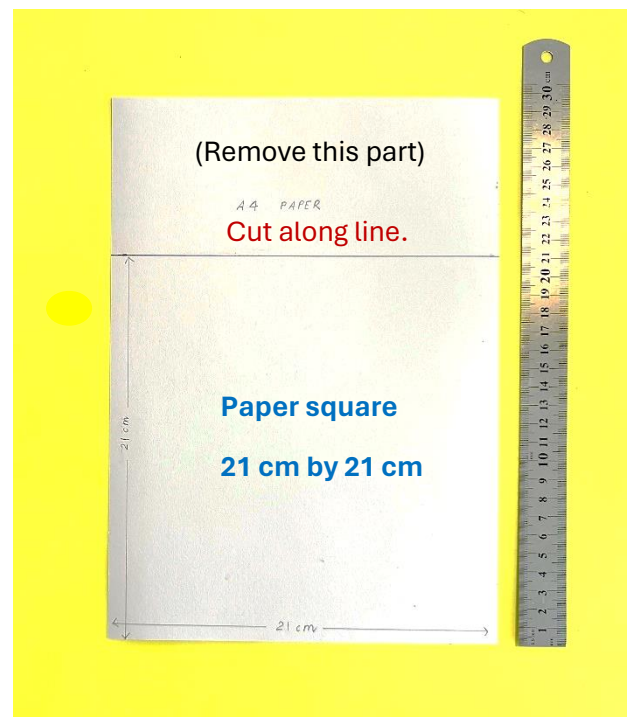

1. Collect an **A4** sheet of paper (thick paper is best). The short edge of A4 paper is 21 cm long.
2. Using a ruler measure 21 cm against the long edge of the paper and mark with pencil.
3. Repeat step 2 against the other long edge.
4. Rule a line between the two pencil marks.
5. Cut out your square, by carefully cutting along the pencil line with scissors.

Use this square to design your element artwork (other sizes are not allowed).

We look forward to receiving your entry in the post! 😊
