

BRIGHT – ADS Wiggler

Another significant milestone for the ADS Beamline.

After some initial assembly and testing, the ADS Superconducting multipole wiggler (SCMPW) was installed into the Storage Ring during the Dec/Jan shutdown.

Following vacuum pumping and cryogenic cooling, the SCMPW was tested to full operational field (4.5 Tesla).

ADS SCMPW in the Storage Ring (sector 10 ID)
Commissioning begins in February 2026
