Product Code	10020 50MBq - 600MBq 10233 700MBq - 1200MBq 10233 2000Mbq - 6000Mbq
Indications	Sodium Iodide (131I) Therapy Capsules are indicated in the treatment of hyperthyroidism and the detection and ablation of residual functioning thyroid tissue in differentiated thyroid carcinoma.
Chemical Form	Sodium Iodide absorbed on an hydrous di-Sodium Hydrogen Phosphate
Physical Form	Capsule in 10 mL serum vial
Specific Activity	Greater than 185 TBq Iodine-131/g Iodine
Radionuclidic Purity	Greater than 99% Iodine - 131
Radiochemical Purity	Greater than 99% Iodine - 131 as Iodide following dissolution
Pack Size	As per decay chart above
Calibration	0900 hours Sydney time Monday
Availability	Made to order - orders received by 1300 hours Sydney time will be despatched the same day for Australian customers
Expiry	14 days after calibration
Aust R	22808
