

**RETURNING Gentech® Mo-99/Tc-99m Generators**

**AUSTRALIAN CUSTOMERS**

- 1) Refer to the calibration date on the Gentech® Generator and **ensure 4 weeks have passed from the calibration date**. The shipper of these return generators is responsible to ensure compliance.
- 2) Remove the needle from the generator and rotate the top plate to cover the needle recess.
- 3) Remove the radioactive labels from the outside of the packing carton.
- 4) Generators must be returned as 'radioactive material, excepted packages, limited quantities of material - UN2910' .
- 5) On the top of the carton, apply the Return Address Labels over the original delivery label, ensuring the original barcode is covered or crossed out. Also ensuring any other barcode on the package is covered or crossed out with black marker so it cannot be read.
- 6) Place the generator into the pack and carefully replace the expanded polystyrene sections.
- 7) Seal the box with packaging tape.
- 8) For customers outside of the Sydney Metro area Call and request a generator return collection:  
Contact your local "TNT" office (Telephone 13 11 50) OR "Toll Priority"  
(Telephone 13 15 31)
- 9) Request a consignment note from the courier company if required and complete as below
