

26 May 2020

### **UPDATE: ANSTO scheduled maintenance**

As previously communicated, ANSTO will undertake scheduled preventative maintenance shutdown of the OPAL Reactor and Mo-99 Production facility. The dates of the shutdown have been amended and will occur from 9 June to 27 June 2020.

During the period of this shut-down, ANSTO will work with our international manufacturing and logistical partners to facilitate the continuity of supply.

As part of the Australian Government's commitment to the nuclear medicine community, ANSTO will ensure any additional costs associated with importing product will be absorbed and not be passed on to our customers.

Thank you to the Nuclear Medicine Advisory Board and Working Group, with representation from RAINS, ANZSNM, AANMS, NSW Health, TGA and GMS, who have helped to communicate the importance of this scheduled maintenance work to support the long term reliability of supply.

#### **Next Steps:**

Please contact our Customer Service Team if you have further questions and to help you better identify your options during the preventative maintenance shutdown period.

A table outlining the adjustment to supply of products can be viewed [via this link](#).
